

What to Do Next

You are in a growing number of people who know the truth! Spread it in the face of information and we'll defeat our Haunted Carnie government in no time.

Want to be a hero? Share these secrets.

Want to be a prophet? Do it before the economic collapse.

Important people to tell

- The military and police: Let them know they're being conned
- College students: They dream of revolutions
- Unions, activists, and protest groups: They've got infrastructure for action
- Everybody: **Tell them we are free.**

Haunted Carnie Meme Pages

Do you follow any popular meme pages online? No matter the niche, you'll find some common themes in your feed:

- All problems, no solutions: Tell us over and over that the world is terrible. **Instill learned helplessness** so they think there's nothing we can do about it.
- Sow political discord: Tell us the problem isn't those stealing all the money; it's people just like us with different politics.
- Snark, irony, and bitterness: Tell us we should be assholes, that we should clap-back at others, and make us pissed off at our fellow man.
- Nostalgia for when the American Dream wasn't dead. Convince us we can only dream of better circumstances that passed us by.

What do we mean by **Haunted Carnies**? Criminals convincing us we're in hellworld so they can steal.

Dipshit Secrets of our Rotten World

When it feels like **World War III** and **the economy collapses**, you'll know exactly why.

—

An **OCCUPY RETURNS** booklet.

Our only goal: **Abolish our criminal government** and replace it with one that serves all.

We are the 100%.

Facts About Peter Thiel

- He co-founded PayPal with Elon Musk and the PayPal Mafia.
- An early and important Facebook investor. He convinced Mark Zuckerberg to allow and promote political disinformation
- His company Palantir sells our internet data to the C.I.A.
- He met with billionaire blackmail artist Jeffrey Epstein in 2014.
- He has been a huge proponent of cryptocurrency for years.
- His romantic partner Jeff Thomas fell to his death shortly after the SVB bank run.

About this Research

In March 2023, notorious tech billionaire venture capitalist **Peter Thiel started a bank run** on Silicon Valley Bank, leading to one of the fastest and largest bank collapses in U.S. history.

Your authors knew enough about Thiel that they considered this one of the most suspicious events in world history.

They have done 1,500 hours of research since, uncovering preposterous crimes that affect ALL of our health, safety, and prosperity.

What is Cryptocurrency?

Crypto, a mysterious, unregulated “currency” is the world’s first planetary, decentralized Ponzi scheme industry with its own high-frequency trading shadow banking theft network!

Every dollar that was used to buy crypto was stolen via the U.S. stock market, but its theft has not yet been revealed.

Soon, we’ll have a global economic collapse when the crypto Ponzi goes insolvent and the market will “lose” trillions of dollars that have already been stolen.

The Truth About 9/11

Why did Bush, Bin Laden and Saudi Arabia ALL do 9/11? To keep us in fear

Aside from the endless war profiteering, nationalism, and increased surveillance, it was so that we would NEVER FORGET that the American Dream is dead and we live in hellworld.

(Ever see Jeffrey Epstein’s George W. Bush painting? These supervillains are mocking us)

The Truth About COVID

Their most evil Ponzi kayfabe! How did they disguise history’s most glaring stock market anomaly from the theft of trillions via crypto?

They unleashed a pandemic and called the most criminal companies the “stay at home stocks”

Is *Everybody* in on it??

It’s like cheating at the Tour de France.
It isn’t everybody, but it is all the winners.

The Simpsons is Evil Brainwashing

The Simpsons has had 27 writers who went to Harvard. That’s so they can serve their criminal interests through popular media.

The goal: Tell us the American Dream is dead because we’re too oafish, divided, and morally decayed while the rich and powerful bleed us dry.

The Monorail Episode: Because we’re collectively stupid, we have no choice but to listen to dazzling Ponzi Schemers

Lisa the Iconoclast: If anybody ever tells you our government was taken over by con artists, it’s best to ignore, attack, and dismiss them

“Do it for her:” One of the show’s most “touching” moments tells us we’re best off slaving away for rich evil bosses.

“Lisa needs braces / Dental plan” Is a common, well-known refrain. They are telling the *public* to worry about those.

Harvard University: Super Crime School

The odds of a random person become a billionaire are ~1 in 3 million. But if they were a Harvard student, the odds are ~1 in 500. That's because they're one of the most powerful organized crime networks in history.

- Ran a **body part theft ring** out of Harvard Medical School.
- Run **Ponzi scheme factories** like Harvard Innovation Labs and Jeffrey Epstein's "Program for Evolutionary Dynamics"
- Created Facebook in order to **surveil us**, monopolize culture, make us feel crappy, and **divide us politically**.
- Helped administer MK Ultra, the CIA brainwashing and psychological torture program.

Other Crime Schools:

- **Stanford**: Created cryptocurrency, Theranos
- **NYU**: Has a blackmail ring and political revenge killings.
- **UNC**: Clinton associate Erskine Bowles assassinated student body president Eve Carson and covered it up.
- Follow billionaires and bullshit science for more

The Art of Kayfabe

Kayfabe is a wrestling technique where they pretend scripted storylines are real.

When our con artist politicians have presidential debates against each other, or when one trashes the other in the media, they are practicing kayfabe: **It's all pretend to make it seem like they're not on the same side.**

Ponzi schemes require kayfabe - the con artists need to justify all their missing money that they stole. The companies stealing crypto money use all sorts of kayfabe to explain poor performance:

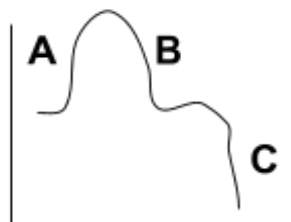

- **Budweiser** and **Target** pretended to have wildly successful **anti-trans boycotts** against them.
- PayPal and Blackrock **moved lots of crypto on their books**: When crypto collapses, so will their stocks.
- Zoom and Peloton blamed **poor management decisions** on their massive falls from their peaks.

Ponzi Scheme Explainer

In a Ponzi scheme, the con artists promise a lucrative investment but they steal the money instead.

They keep a pool of cash to pay out people who sell their investments, but the pool inevitably goes to zero when the cash runs out.

Here is a typical Ponzi stock chart

- A. The criminal stack up cash that is being invested.
- B. They funnel out the stolen cash.
- C. When the cash runs out, the price collapses completely and the Ponzi ends.

This shape is found whether there is one Ponzi, a whole bank of Ponzis, or the crypto super-Ponzi

More Big Ponzi Players

- Virgin Group's **Richard Branson** has countless failed startups that raised huge funds but never produced, He invested in crypto via a "failed" startup out of Stanford called **Clinkle**.
- **Ross Perot**, the first tech billionaire, made a fortune in early digital currency and network technology. His company had one of the largest, fastest stock price gains and falls in history. His son invest in Clinkle.
- **Mark Cuban** inherited Ross Perot's software company, and his a huge crypto promoter. Shark Tank is a fraud: They already own that cheapo crap, and some of it is for Ponzis
- **Elizabeth Holmes**: Theranos, out of Stanford, sounds like a classic biomed Ponzi scheme, except her billionaire investors were in on it, just like Clinkle. They wanted her to "lose" their investments so they could secretly fund the crypto Ponzi pool.

Big Ponzi Players

- **Elon Musk** has moved massive amounts of stolen crypto cash through Tesla's stock. When he co-founded PayPal, they were trying to make crypto but the theft tech wasn't there yet.
- **Jeffrey Epstein**: Best known as a teen sex blackmail artist, but he **ran a fantastical science Ponzi factory** at Harvard University called the "Program for Evolutionary Dynamics" and stole the money via Bear Stearns, which was supposed to collapse and helped bring about the Great Recession in 2008.
- **Bill, Hillary, and Chelsea Clinton**: Virtually EVERY participant at the 2022 Clinton Global Initiative has ties to cryptocurrency! That's because it's international money laundering disguised as charity. Jeffrey Epstein helped co-found it.

Our Last Change in Government

To understand how we got here, we need a history lesson on the **Central Intelligence Agency**. The CIA is a **SECRET CRIMINAL** organization:

- Secret: They never tell us anything they do
- Criminal: Everything we find out about is kidnappings, assassinations, military coups, drug running and literal brainwashing.

George H.W. Bush was the CIA Director, which means he was a Secret Criminal. In 1988, Bush became President:

**SECRET CRIMINAL + WHITE HOUSE =
SECRET KLEPTOCRACY**

From then on, the explicit goal of the government was to steal from the public while pretending it's a Democracy.

In other words, our government is a
CULT WITH STATE POWER

When Shit Hits the Fan

We know crypto will **collapse the economy soon** because of the March 2023 bank failures: This signals that they're no longer investing in the crypto pool.

It won't just be crypto - **it will collapse of half the U.S. stock market** because those companies were stealing trillions of dollars out of the crypto exchanges.

When it does collapse, our criminal government will use kayfabe to shift the blame from crypto. We don't know all the details, but evidence points to:

- A "**false flag**" **attack** that gets blamed on our enemies, likely Russia and/or China
- Since **many Silicon Valley companies will collapse**, it might include a power grid attack or internet outage.
- The **Titan submersible implosion was fake**: There is no video evidence it could go to deep sea, and it's just like Richard Branson's Virgin Oceanic Ponzi scheme. Expect a strange event and the promotion of bullshit conspiracy theories around it.
 - **Q-Anon and Pizzagate** are examples of this: Nonsense to hide the fact that the main characters are financial criminals.

The Most Important Political Speech in World History

At the 1988 Democratic National Convention, Bill Clinton gave a vile, hate-filled speech in "support" of Democratic Presidential nominee Mike Dukakis.

The speech is a sly admission that **Clinton blackmailed Governor Mike Dukakis** because he was secretly on George Bush's side*.

It means every election has been a sham since: Clinton was with Bush (and Ross Perot); Gore was with George W. Bush; Hillary was with Trump; Biden is with Trump, etc.

*More evidence:

- The Rob Lowe Teen Sex Tape. It was political blackmail, filmed at the 1988 DNC, where Lowe was supporting Dukakis.
- Months after this speech, Mike's wife Kitty Dukakis hospitalized for drinking rubbing alcohol.
