Dear Reaching for the Stars Program,

I hope this message finds you well. My name is Omar Shamsi and I had the honor and privilege of teaching during the 2019 summer session in Stockton California with the José M. Hernández Reaching for the Stars Foundation. It was an unforgettable experience, and I will always treasure the moment when I had the opportunity to meet José Hernández in person and shake his hand. His dedication to education and his inspiring work continue to motivate me in my efforts to make a difference in the lives of students.

I am reaching out to request your support in funding a new educational curriculum project that will provide top-tier STEM and STEAM resources to students worldwide, including those right here in the United States. This initiative is designed to give students the tools and knowledge they need to excel in science, technology, engineering, arts, and mathematics—fields that are essential to the future of our global society.

At Shamsi Engineering, we believe that education in STEM and STEAM is crucial not only for the present and past generations but also for the future. In an age where technology is evolving rapidly, it is imperative that students gain not only the technical skills needed to succeed but also a solid understanding of the ethical considerations surrounding the use of emerging and existing technologies. Ethical decision-making in science and technology is critical, and it is a priority that we instill in students to ensure that these innovations are used responsibly for the greater good of humanity.

Through this Partnership Solicitation between Shamsi Engineering with the José M. Hernández Reaching for the Stars Foundation, Shamsi Engineering aims to offer to develop curriculum resources that are not only comprehensive and engaging but also emphasize the importance of ethical leadership in STEM fields. Your mutual support will help fund the development and distribution of these materials [both domestic and international], as well as provide valuable training for educators and hands-on learning opportunities for students.

By contributing to this project, you will be helping to empower the next generation of leaders, thinkers, and innovators who will shape the future with both skill and integrity. Together, we can create a global network of educated, ethical STEM and STEAM students who are equipped to meet the challenges of an ever-changing world.

Thank you for considering this opportunity to make a lasting impact on the future of education and technology. I would be happy to discuss the project further or provide more details on how we can work together to bring this vision to life.

Warm regards,

Omar Shamsi
